

# Project: Chicago Kluczynski Federal Building Roof Anchors

Project Completed: 2016

Overview: Bach Steel provided fabrication and installation of roof anchors as part of a rooftop renovation project for the Kluczynski Federal Building in Chicago, Illinois. The anchors were fabricated in the Bach Steel shop and installed on-site by Bach Steel as well. Fabrication and installation included the use of welding. The purpose of the anchors is to provide support for window washing platforms, etc. As such, providing the highest quality welds was absolutely essential to ensure that these anchors will safely support their loads. All anchors were load-tested by the Engineer after installation.
