

# Project: Farm Lane “Marsh Creek” Bridge

Project Completed: October 2020

Overview: This project involved the relocation and reuse of a historic pony truss previously located in Adams County, Pennsylvania. The bridge was reused at Auburn Heights Preserve in Delaware as a vehicular bridge. To accommodate the required loading, the trusses were attached to steel stringers which help by carrying the heavier loads, while the trusses are carefully attached so as to retain their original appearance. Work included misc. repairs to the truss

Bridge before relocation.

Bridge before relocation.

Bridge parts after being dismantled.

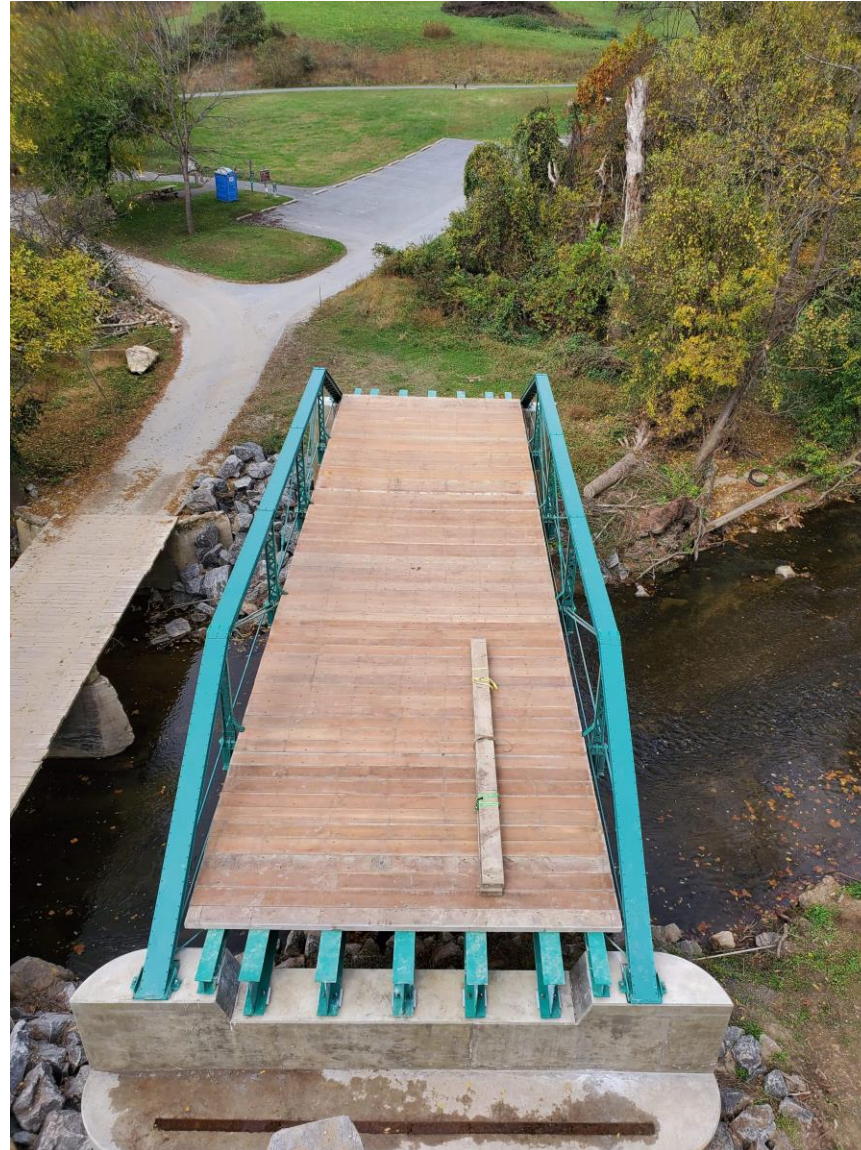

Bridge assembly.

Assembled bridge in place.

Assembled bridge in place with deck.
