

# Project: Iron Bridge Road Bridge (Pike County, Indiana: Bridge 150)

Project Completed: 2021

Overview: This project involved the relocation and restoration of a historic 1875 cast and wrought iron bowstring bridge. The work included careful removal of modern, non-historic outriggers that had been added to stabilize the bridge for highway use. The new usage as a pedestrian bridge did not require these. The bridge was instead made usable by adding smaller vertical posts to the bridge to strengthen it.
