

Project: 2021 SEMA Show in Las Vegas

Project Completed: October 2021

Overview: Bach Steel's Derek Pung was proud to team up with Kens Kar Kare in Fowler, Michigan to create a custom Jeep for the 2021 SEMA Show in Las Vegas. We are excited to announce that they have won first price in their category!

Derek really shined on this project, and he completed the project with such a limited amount of time to let his creativity to come out, yet he still managed to hit it out of the park! At the heart of the project was the use of leftover iron from historic iron truss bridges that Bach Steel has worked on, and the work included the use of hot driven rivets on the metal as well. These features truly made this a unique entry at SEMA, something that has likely never been done before. Derek has been a great friend and business partner here at Bach Steel and we are all proud to call him both! CONGRATULATIONS to KEN & DEREK!!!
